

- $\pm 2\%$ Full Scale Accuracy ($\pm 3\%$ F.S. for Rectifier)
- UL Recognized
- Phenolic Cases and Glass Windows
- Two Popular Sizes: 2-1/2", 3-1/2"

For industrial or commercial applications, the Round style panel meter offers maximum readability and $\pm 2\%$ full scale (F.S.) accuracy (3% full scale for rectifier type). With a rugged black phenolic case and glass window for optimum viewing, the Round style meter is one of our most popular choices for tough environmental applications. AC units have either iron-vane type or rectifier type movements and are calibrated at 60Hz. Iron-vane type voltage meters have a frequency range of 25 to 125Hz (for $\pm 1\%$ deviation from value at 60Hz). Calibration to 800Hz is available on special order (All rectifier types have 25Hz to 10KHz range). Two popular sizes of 2-1/2" and 3-1/2" are available to measure various voltage ranges. This style meter is ideal for many other electrical functions. See the "Function Reference Table."

Model 183 Multiplier

The Model 183 external multiplier enables an iron-vane type voltage meter to monitor up to 1000 AC volts. An external multiplier is used with a 150 AC voltage meter that is scaled proportionally to your measurement range. Simpson's AC meters having a range of 500 volts or higher are furnished with the Model 183. Simpson's external multipliers are available for immediate delivery from your local distributor. Other intermediate ranges are available on special order.
