10-128	GC Super Adhesive
--------	-------------------

### **DESCRIPTION:**

A Cyanoacrylate adhesive that is a medium setting, general-purpose grade designed to bond a wide variety of similar or dissimilar materials. This product is a versatile adhesive offering good climatic, thermal, and impact resistance. Can be used on metal, porcelain, plastic, glass, most rubbers, hardwoods and other non-porous material with smooth, close-fitting surfaces. The bond resists softening at temperatures up to 320°F (160°C). Fills gaps to .003".

### **TYPICAL PROPERTIES:**

Color	Clear
Specific Gravity	1.05 @ 75°F
Flashpoint	80°C
Viscosity	30 cps
Cure Strength	5000 psi

### **INSTRUCTIONS:**

1. Surfaces should be clean and free from contaminants.
2. Apply in small amounts to one surface only.
3. The parts should then be mated together under slight pressure. This causes the adhesive to spread out into a thin film and assures optimum adhesive performance. The pressure needs to be applied for several seconds.

### **CURE:**

Cures rapidly in 15-60 seconds with full cure in 24 hours.

### **SHELF LIFE:**

12 months
