

Asahiklin AK225 AES

Light Duty Defluxer 1666

Introduction

Using ethanol instead of methanol as the defluxing additive, Asahiklin AES offers improved user safety. Ethanol, although not as good a defluxing solvent as methanol, is much safer to use. The azeotropic mixture is non-flammable and safe on plastics and metals. Configured for vapor degreasing and cold-batch cleaning, AES is the safer choice for flux removal.
