

# Brush Attachment

1991, 1992, 1993, 1994

## Introduction

---

The Brush Attachment is an economical unit designed for precise control of cleaning applications. Simple in design and structure, the Brush attachment allows convenient, one-handed cleaning. Special fittings, hoses, holders and expensive valves are unnecessary. The Brush Attachment is simply installed on top of the aerosol container. The valve allows complete control of the amount of solvent applied. A variety of brushes are available for use with the 1991 Brush Attachment. The medium horse hair brush (1992) is recommended for most electronic cleaning applications. The long horse hair brush (1993) is designed for more sensitive areas. The brass brush (1994) is designed for aggressive cleaning of stubborn soils and precious metals.

## Chemical Components

---

This product does not contain any hazardous ingredients as per OSHA 29 CFR 1910.1200 Subpt.(z).

## Environmental Policy
