PF-1

PF-1 is moulded from a material which combines non-slip properties with toughness and wear resistance
Fixing is by woodscrew size No 8 or 10 Standard colour black
PF-1GFN Special heat resisting version used for laboratory equipment

RF-1

SAME AS PF-1 BUT MADE FROM SYNTHETIC RUBBER

PF-2

PF-2 is a low cost moulded plastic component intended for cabinets where our PF-1 is too large
Standard colour is black
Fixing is by woodscrews size No 8

RF-2

SAME AS PF-2 BUT MADE FROM SYNTHETIC RUBBER

Weight 7.2kg /1000
PART No. CL1914

RF-1 9.6kg /1000
CL1916

PF-2 4 4kg./1000
OD6591

RF-2 5.8kg /1000
OD65915

SPEAKER ACCESSORIES

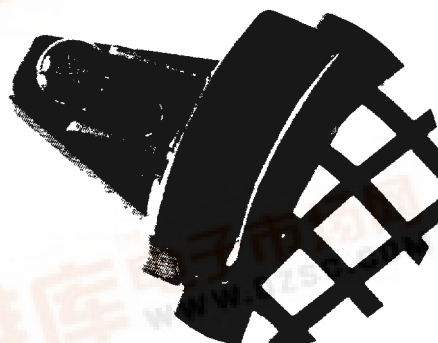

SFC-1, SFC-2 Loudspeaker Fixing Clamps.

SFC-2

SFC-1

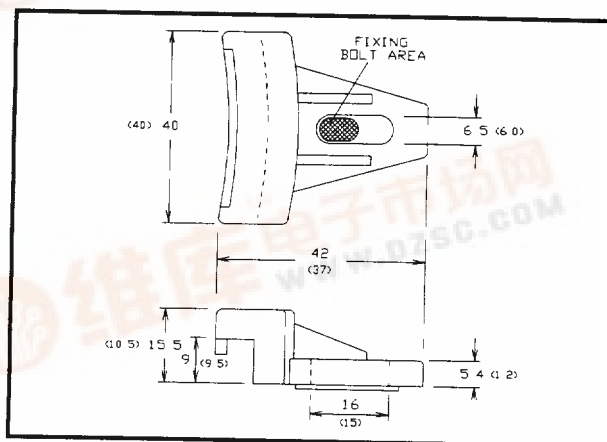

SFC-1 is a tough moulded plastic component designed to fix loudspeakers to the front of enclosures. It is suitable for 8" to 15" speakers. Fixing is by nut/bolt or bolts + 'T' nuts. When clamping down, the SFC-1 bends slightly. This is a designed-in feature and gives the fixture a high degree of resilience. Excessive bending must be avoided by packing under flange. For OEM's the front of the component can be printed with manufacturer's logo

PART No. CP3635. Weight 8 6kg./1000

SFC-2 Similar design to SFC-1 but made from steel. Black finish. Dimensions shown ()

PART No. FC68770. Weight. 10kg /1000

GC-1 Baffle Fastener.

GC-1 is a low cost component comprising a plug + socket assembly, which is designed for retaining a speaker grille in position. The socket is pressed into a pre-drilled hole in the cabinet front. The plug is snapped into the socket hole, and the grille pressed onto the plug end. The assembly permits rapid removal / assembly of grilles, whilst providing an inexpensive fixture

PART No. FC6860 Weight 5kg /1000
