Product Description

The AG201-86 is a general-purpose buffer amplifier that offers high dynamic range in a low-cost surface-mount package. At 900 MHz, the AG201-86 typically provides 11 dB gain, +19.5 dBm OIP3, and +6.5 dBm P1dB. The device combines dependable performance with consistent quality to maintain MTTF values exceeding 100 years at mounting temperatures of +85 °C & is housed in a SOT-86 (micro-X) industry-standard SMT lead-free/green/RoHS-compliant package.

The AG201-86 consists of Darlington pair amplifiers using the high reliability InGaP/GaAs HBT process technology and only requires DC-blocking capacitors, a bias resistor, and an inductive RF choke for operation.

The broadband MMIC amplifier can be directly applied to various current and next generation wireless technologies such as GPRS, GSM, CDMA, and W-CDMA. In addition, the AG201-86 will work for other various applications within the DC to 6 GHz frequency range such as CATV and fixed wireless.

Operating Temperature	-55 to +85	°C
Thermal Resistance, $R_{\theta JA}$ (1)	15	°C/W
Junction Temperature, T_{JC} (2)	117	°C

(1) The thermal resistance is referenced from the hottest part of the junction to the ground lead (pin 2 or 4).
(2) This corresponds to the typical biasing condition of +4V, 20 mA, at 85 °C. A minimum MTTF of 1 million hours is achieved for junction temperatures below 77 °C.

Mounting Config. Notes

- Ground / thermal vias are critical for the proper performance of this device. Vias should use a .35mm (#80 / .0135") diameter drill and have a final plated thru diameter of .25 mm (.010").
- Add as much copper as possible to inner and outer layers near the part to ensure optimal thermal performance.
- Mounting screws can be added near the part to fasten the board to a heatsink. Ensure that the ground / thermal via region contacts the heatsink.
- Do not put solder mask on the backside of the PC board in the region where the board contacts the heatsink.
- RF trace width depends upon the PC board material and construction.
- Use 1 oz. Copper minimum.
- All dimensions are in millimeters (inches). Angles are in degrees.
