HVAC Duct Temperature Sensor

Thermometric's duct sensors are OEM solutions for measuring the temperature of air in ventilation ducts. The temperature reading is wired to a control module, where the system compares the temperature reading to a temperature set-point and adjusts outputs accordingly.

Features

- High accuracy OEM sensor
- High Sensitivity & reliability
- Excellent interchangeability
- High Reliability
- Twist and lock installation

Applications

- HVAC vent temperature (automotive)
- In cabin temperature (automotive)
- Air Temperature
- HVAC Airflow monitoring (industrial)
- Industrial automation – Ambient environment and process monitoring

Specifications

- Part Number: A-1996
- Mating connector Delphi part number: 12047662
- Resistance at 25°C : 2,795 ohms $\pm$ 2.50%
- Beta (25/85) : 4073
- Plastic : Nylon
