

8 Series Pushbutton Switches

■ Features

1. Contacts

Silver or gold-plated contacts.

2. Epoxy resin case

UL94V-0 self-extinguishing epoxy.

3. Actuator style

Over 30 actuator variations.

4. Insulation between terminal and ground: 4 mm minimum.

5. Prevention of flux entry

The epoxy resin seal on bottom of the switch helps prevent the entry of solder and flux.

6. Insulation barrier:

Insulation barrier design between poles helps prevent short-circuiting between poles ensuring high reliability.

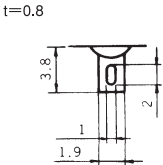

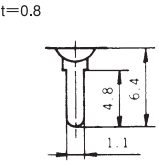

7. For UL-recognized and CSA-approved products, please refer to P.280.

■ Specifications

Rating	Max. rating	6A 125VAC/3A 250VAC/4A 30VDC	
Initial contact resistance	10m Ωmax. (1A 2~4VDC)		
Initial dielectric strength	1,500VAC 1 minute		
Initial insulation resistance	1,000MΩ min. (500VDC)		
Electrical life (Excluding 8R & 8W)	Alternate type	40,000 operations	
	Momentary type	25,000 operations	
Operating temperature range	-30℃~+85℃		
Storage temperature range	-40℃~+85℃		

(Excluding 8R & 8W. Specifications on 8R and 8W series are specified separately on P.271 and P.273.)

■ Terminal Styles

Solder (Style:1)	Straight (Style:2)

8N

RoHS Compliant

Standard Pushbutton Switches

Features

The **8N** standard pushbutton switch is the basic type of “8” Series. Momentary and alternate functions are available.

Color button is available in 8mm, 10mm and 15mm diameter and in eight colors.

Precautions (8N•8P•8R•8W•8Y)

1. Soldering Specifications

(1) Manual soldering

Device : Solder iron

① 420°C Max. 3 sec. Max.

(2) Auto soldering

② 275°C ±10°C 5 sec. Max.

The above-stated soldering conditions shall apply only to switches with straight terminals. Auto soldering is not possible with right-angle terminals. Switches with right-angle terminals should be soldered manually according to the conditions specified in (1) above.

(3) When putting the switches through an aging process after they were soldered onto the printing board or after installed into a complete end product, be sure to remove the buttons of the switches.,

2. Mounting

- Do not bend the terminals before mounting the switch on the PC board.
- After mounting the switch, do not place the device in such a way that the device weight will be applied on to the actuator of the switch.
- For switches with straight terminals, solder the switch on the PC board after fixing the switch on the panel with a nut.

3. Flux Cleaning

- (1) Solvent : Fluorine or Alcohol type.
- (2) 8A/B/C/D/E/F/J/S series are not washable. To wash the PC board, clean the soldering surface of the PC board with a brush so that the switch is not exposed to the cleaning solution.
