

PIC32 Microcontroller Families

PIC32[®]

Performance-Leading PIC32 Microcontrollers

Building on the heritage of Microchip Technology's world-leading 8- and 16-bit PIC® microcontrollers, the PIC32 family delivers 32-bit performance and more memory to solve increasingly complex embedded system design challenges.

Broad Portfolio

From simple USB device connectivity to RTOS-driven graphical user interface applications with advanced audio processing, there is a PIC32 device to meet your design challenges.

- PIC32MZ with Floating Point Unit (FPU) Series: Up to 252 MHz/415 DMIPS, M-Class core with DSP instructions
- PIC32MX Series: Up to 120 MHz/150 DMIPS, MIPS® M4K core
- Floating Point Unit for fast single- and double-precision math
- Memory Management Unit (MMU) for optimum embedded OS execution
- Fast interrupts and context switch
- Dual-panel Flash with live update
- 16 KB to 2 MB Flash
- 4 KB to 512 KB RAM for data and program execution
- Temperature range: -40 to 85°C; -40 to 105°C; 0 to 70°C; -40 to 125°C
- AEC Q100 qualified: Grade 1 and 2
- Low pin count devices with Peripheral Pin Select (PPS) for pin remapping of most digital I/O

Industry-Leading Compatibility

Create scalable products in a consistent environment.

- Common MPLAB® development tools
- Pin- and peripheral-compatible with 16-bit PIC MCUs
- Common software stacks across MCUs
- Common tools environment for over 1,270 PIC MCUs

PIC32 Software Solutions Support

Get the latest updates at www.microchip.com/harmony.

USB	USB Host, Device, with Class Drivers
Graphics and Touch	Microchip Graphics Library MPLAB® Harmony Graphics Composer Touch System Service Library
CAN	CAN Driver and PLIB support for PIC32
Audio and Speech	Basic Audio Decoders: Speex, WAV, Opus; Premium Audio Decoders: MP3, AAC, WMA USB Audio 2.0 Device Class (Hi-Res Audio); PIC32 Bluetooth Audio Software
Wi-Fi®, Bluetooth® and Ethernet	Microchip TCP/IP with SSL and BSD; Bluetooth SPP Stack for PIC32; Wi-Fi Software Library; PIC32 Bluetooth Audio Software
Encryption	Cryptographic Library; wolfSSL SSL/TLS Library
Basic Libraries	File System Library; Floating Point Math Library; Peripheral Library; Fixed Point Math Library; Fixed Point DSP Library
Boot Loader	Serial Port Boot Loader USB Host Boot Loader Ethernet Boot Loader USB Device Boot Loader

Fast, Easy Development

Shorten your project design cycle.

- Free MPLAB X Integrated Development Environment supporting all Microchip MCUs
- Free MPLAB XC32/XC32++ Compiler
- MPLAB Harmony Software Framework to get you started with communications, graphics, Bluetooth®, file system, audio and signal processing
- Work in a familiar environment with a broad third party ecosystem of IDEs, RTOS and debuggers
- Cost effective development kits with free C compiler

More Design Options

Simplify your system design through integration.

- Extensive analog and digital peripherals including 10/100 Ethernet MAC, I²C, I²S, 10/12-bit ADCs with up to 48 analog channels, serial communications, SQI, EBI and Hi-Speed USB
- Up to 26 DMA channels
- 8/16-bit parallel master port supporting graphic interface and additional memory
- Capacitive touch for improved human interfaces with capacitive buttons or slider control

MPLAB Harmony for PIC32

Introduction

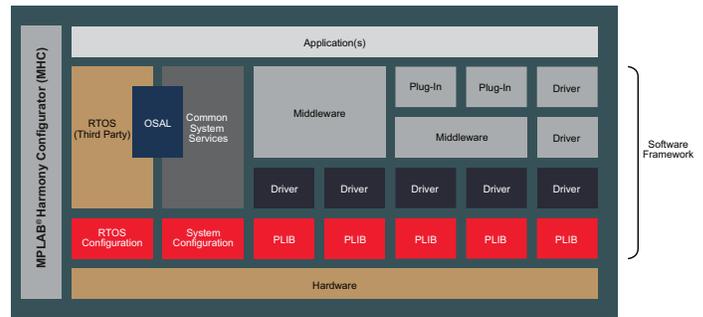

MPLAB Harmony is a flexible, abstracted, fully integrated firmware development environment for PIC32 microcontrollers. It enables robust framework development of interoperable RTOS-friendly libraries with quick and extensive

Microchip support for third party software integration. MPLAB Harmony includes a set of peripheral libraries, drivers and system services that are readily accessible for application development. The code development format allows for maximum re-use and reduces time-to-market. It features the MPLAB Harmony Configurator (MHC) plug-in that provides a graphical way to select and configure all MPLAB Harmony components, including middleware, system services and peripherals with ease.

The MHC plug-in also integrates MPLAB Harmony Graphics Composer to easily configure and visually design the MPLAB Harmony Graphics Primitive Library and the MPLAB Harmony Graphics Object Layer.

MPLAB Harmony Block Diagram

Benefits

- Faster time-to-market
- Improved code interoperability
- Simplified support
- MPLAB Harmony Configurator (MHC) for enhanced user experience
- Improved 32-bit scalability
- MPLAB Harmony Graphics Composer
- Enhanced third party software integration

PIC32 Software Development Tools Available with MPLAB Harmony

Applications	Operating System Abstraction Layer (OSAL)	Middleware/ Software Libraries	Device Drivers	Development Software	Third-Party Software

Additional software components planned

Application Layer

- Implements desired overall behavior
- Abstracted hardware access
- Allows for easy port across PIC32 parts

Common System Services

- Provides common functionality to avoid duplication and conflicts
- Eliminates complex interactions and interdependencies between modules
- OSAL provides OS compatibility and interface
- Manages shared resources
- Supports low-level configuration and board support package

Peripheral Libraries (PLIB) Layer

- Provide functional interface for Microchip PIC32 scalability
- Implements part-specific features

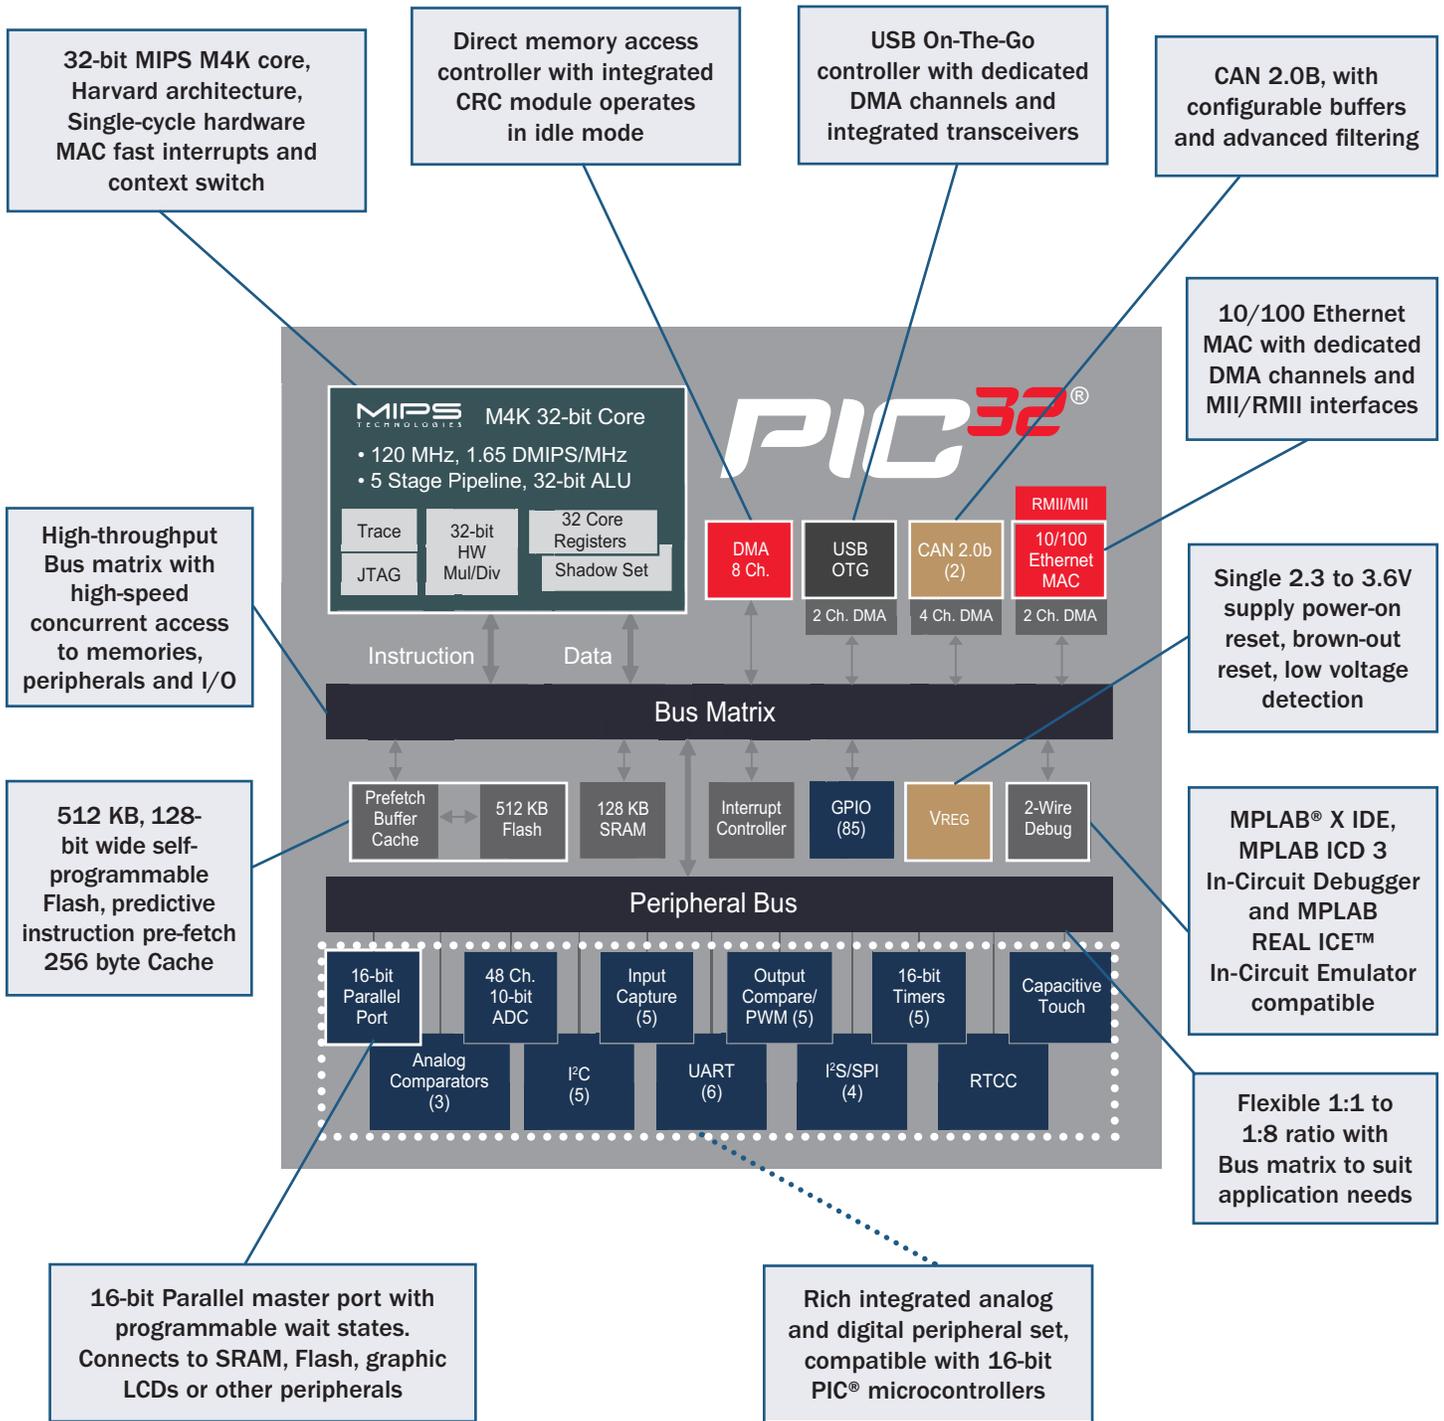

Middleware Layer

- Implements complex libraries and protocols (USB, TCP/IP, file systems, graphics)
- Provides a highly abstracted application program interface
- Libraries are thread-safe and RTOS-ready
- Built on drivers, PLIBs, system services
- Supports third party library integration

Device Driver Layer

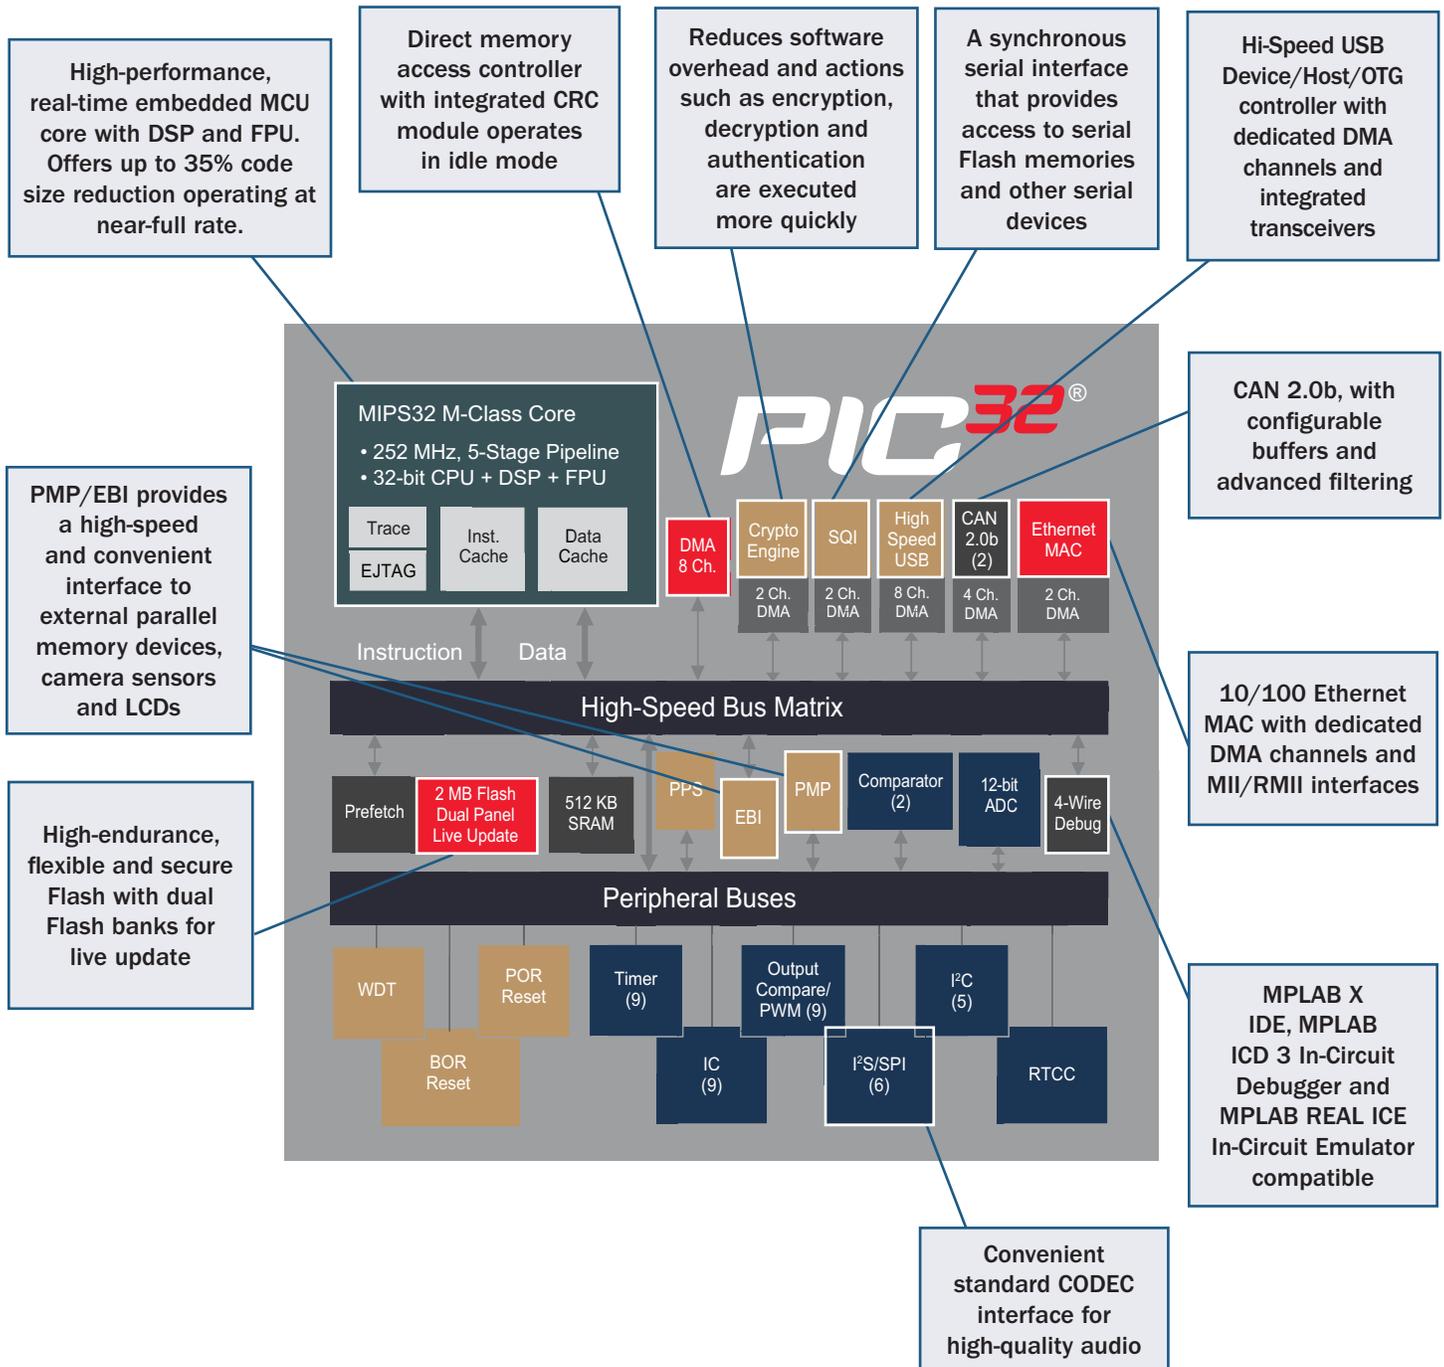

- Provides highly abstracted interface to peripheral
- Controls access to the peripheral
- Manages multiple hardware instances and software clients with select drivers
- Manages peripheral state and multiple peripheral instances
- Accesses hardware via PLIB
- Supports blocking or non-blocking code

Inside the MIPS® M4K Core PIC32 MCU

Note: Not all features are available on all PIC32 devices. Please see product family table for more information.

Inside the MIPS32® M-Class Core PIC32 MCU

Note: Not all features are available on all PIC32 devices. Please see product family table for more information.

Developing with the PIC32 Microcontroller

Microchip is the only silicon vendor with a full 8-, 16- and 32-bit microcontroller portfolio supported by a unified development environment. The MPLAB X IDE is free and easy to use.

PIC32 Starter Kits

Getting started is easy with any of the fully integrated PIC32 Starter Kits. They feature simple installation, a getting started tutorial and a PIC32 starter board which easily connects to your PC via USB. The starter kits include:

- MPLAB X IDE and MPLAB XC32 C Compiler†
- PIC32 starter board with integrated programmer and debugger
- Code examples, documentation, tutorials and sample projects; optional I/O expansion board allows signal breakouts and connections for PICtail™ Plus daughter cards

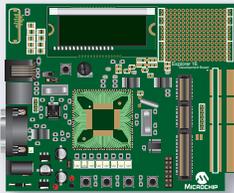

†Free version has **no code size limit** and full optimizations. After 60 days some optimizations are disabled.

MPLAB Harmony Board Support Packages (BSP)

A Board Support Package provides code and configuration items necessary to support board-specific hardware. A BSP may contain a board-specific configuration header, a board-specific system initialization file, a file containing board-specific ISR implementations. Everything that is contained within a BSP can be either used or replaced by application-specific items if desired.

Application	Development Tool	Part Number
Connectivity: USB, Ethernet, CAN, Wi-Fi® and Bluetooth® SPP	PIC32MX1/2/5 Starter Kit	DM320100

Package Options

28-pin QFN
6 × 6 mm (ML)

28-pin SSOP
10.2 × 7.8 mm (SS)

28-pin SOIC
17.9 × 10.3 mm (SO)

28-pin SPDIP
36 × 7.5 mm (SP)

36-pin VTLA
5 × 5 mm (TL)

44-pin VTLA
6 × 6 mm (TL)

44-pin TQFP
10 × 10 mm (PT)

44-pin QFN
8 × 8 mm (ML)

64-lead TQFP
10 × 10 mm (PT)

64-lead QFN
9 × 9 mm (MR)

124-lead VTLA
9 × 9 mm (TL)

121-ball BGA
10 × 10 mm (BG)

100-ball TFBGA*
7 × 7 × 1.2 mm

144-ball TFBGA*
7 × 7 × 1.2 mm

100-lead TQFP
12 × 12 mm (PT)

100-lead TQFP
14 × 14 mm (PF)

144-lead TQFP (PH)
16 × 16 × 1 mm

144-lead LQFP (PL)
20 × 20 × 1.4 mm

*For availability please contact your local Microchip Sales Office.

Support

Microchip is committed to supporting its customers in developing products faster and more efficiently. We maintain a worldwide network of field applications engineers and technical support ready to provide product and system assistance. In addition, the following service areas are available at www.microchip.com:

- **Support** link provides a way to get questions answered fast: <http://support.microchip.com>
- **Sample** link offers evaluation samples of any Microchip device: <http://sample.microchip.com>
- **Forum** link provides access to knowledge base and peer help: <http://forum.microchip.com>
- **Buy** link provides locations of Microchip Sales Channel Partners: www.microchip.com/sales
