

Farnell InOne Code 4261999

Model No. 72-455A

Audio Generator

Features: •Low distortion 10Hz to 1MHz audio generator in five range steps •Sine and square wave output
•Variable amplitude •Output attenuator (-10dB, -20dB, -30dB, -40dB, -50dB) •600ohm output impedance
•External sync input •Power requirements: 100V, 120V, 220V, 240VAC, 50/60Hz •Includes owners manual, test leads and power cord

Specifications	
Generator frequency	10Hz~1MHz, $\pm 0.5\text{dB}$ (600ohm load)
Sine wave output	7V RMS (no load)
Distortion	less or equal to 0.1% (400Hz~20KHz) x100 range less or equal to 0.3% (100Hz~100KHz) x10 range
Square wave output	10V p-p (no load)
Rise/fall time	less or equal to 200nsec
Overshoot	<2%
Dimensions/weight	5 1/2" (W) x
