

## New waterproof, feature-rich telephone test sets: five models to choose from!

Progressive® Electronics' PE900 series of telephone test sets offer technicians at every level the functions, features and quality they need in the ever-changing world of communications.

Five models are available (see page 199). All have many universal features along with model specific features; from Amplified Speaker to 2-way Hands-free with Data Lock-out. These units are also waterproof—they will not only withstand a monsoon rain, they can actually be fully submersed in water.

### CableCaster™

- A 50 foot (15 meter) range allows for faster installations with less number of pulls required.
- Bright yellow body means it is less likely to be left behind.
- Glow-in-the-dark green darts reduce replacement costs because they are easier to locate.
- Darts are aerodynamically designed for high accuracy and faster installation.
- The optional flashlight improves visibility for faster installation.
