8720 SERIES
CARTRIDGE STRIPPER
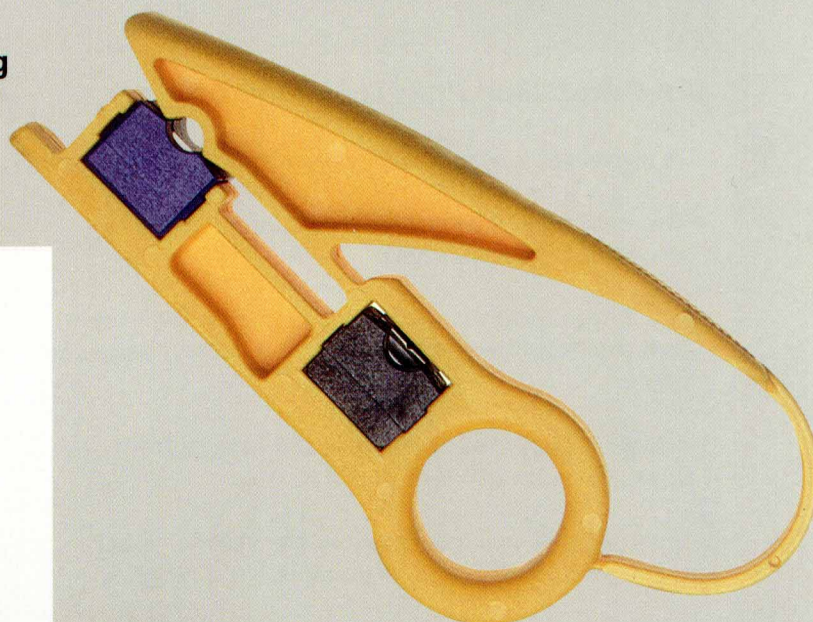

SARGENT QUALITY TOOLS

Made in U.S.A.

The 8700 Series Replaceable Cartridge Stripper can carry two cartridges, providing the user with one tool capable of prepping most popular cable groups.

Cartridge Stripper Features:

- The stripper body is one piece construction incorporating a molded-in living hinge.

- The stripper body is molded from highly visible yellow Delrin Super-Tuff.

- A large finger loop promotes tool rotation during use.

- A storage compartment is provided for the cartridges not in use.

- The black cartridge strips RG6/59 to an industry standard 1/4" X 5/16" prep.

- The grey cartridge strips the RG11/7 to an industry standard 1/4" X 5/16" prep.

- The long life cutting blades are molded to depths which eliminate cutting the braid or nicking the center conductor.

- The cartridges are molded from durable glass filled polycarbonate and are color coded for easy identification.

- Each cartridge has a beveled cable stop which compensates for uneven cut ends to assure proper prep dimensions.

- The cartridge snaps in place from both sides making the tool non-handed.

- Replacement cartridges can be purchased separately.
