Compact sized clamp on meter and multimeter (AC40A, AD40A)

This unique line of mini-clamp meters meets your needs when measuring up to 400 Amps. They use a compact design size to ergonomically fit easily into the hand. Plus its compact size makes it a handy daily tool to fit into the slightest of tool kits. Both have easy to read digital displays with Data Hold capabilities and Analog Bargraph. Plus, you get 10mA resolution when using the 40A range.

The AD40A is an AC mini-clamp ammeter that measures up to 400 A AC in a small space. The AD40A measures low AC current in 40 A range.

The AC40A is a small clamp multimeter that measures up to 400 A AC. The AC40A also measures voltage, resistance, continuity, and low AC current in 40 A range.

The right tool, everyday.™
