

Crescent®

Locked and Loaded

ASME spec locking pliers, loaded with features. Awesome.

COOPER Hand Tools

Designed for superior performance.

Crescent brand locking pliers are made to an exacting standard that results in improved durability and long-term performance. In fact, they meet stringent ASME standards B107.24 and B107.36, as applicable, for product specifications, including strength and maximum jaw opening capacity. Yet, as strong as they are, Crescent locking pliers still maintain the narrow profile required for work in tight and confined spaces. Long nose, curved, and straight jaw pliers feature a patented angled tooth pattern for a better grip, and every style has a tough nickel-plated finish for maximum resistance to rust and corrosion. See the new line of strong Crescent locking pliers soon wherever true professional quality construction tools are sold.

Locking C-Clamps allow quick, easy positioning of workpieces. Swivel tips minimize marring on softer materials.

Locking Welding Clamp holds workpieces firmly in position. Open design allows clear access for welding.

Locking Chain Clamp grips large or irregular-shaped objects effectively, yet minimizes crushing.

The entire line of Crescent locking pliers meets ASME standards B107.24 and B107.36, as applicable, for product specifications.
