

NJM2181

PRELIMINARY

Passive Matrix TruSurround™ 3D AUDIO PROCESSOR

■GENERAL DESCRIPTION

The NJM2181 is a Passive Matrix TruSurround™ 3D audio processor. It regenerates the full surround soundfield directly from any kinds of surround encoded stereo input (Lt/Rt) signals.

After the internal passive matrix circuit decodes Lt/Rt signal into 4 channel signals, the TruSurround virtualizer re-encodes them into 2 channel surround signals. Accordingly any pre-processors decoding into 4 channel signals are not required.

The NJM2181 also includes SRS 3D Stereo and 3D Mono, and regenerates a 3D sound field from either normal L/R input or monoural input.

The NJM2181 is suitable for TV, mini component, CD radio cassette, multimedia speaker system, and others.

■PACKAGE OUTLINE

NJM2181L

NJM2181M

■FEATURES

- Operating Voltage (4.7 to 13V)
- Maximum input Voltage (1.5Vrms typ. at TruSurround)
- Low Output Noise (32μVrms typ. at TruSurround)
- BYPASS Gain (0dB typ.)
- Passive Matrix TruSurround
- SRS 3D Stereo & 3D Mono (Two-grade Switch for 3D Effect)
- BYPASS FUNCTION (Through)
- Bipolar Technology
- Package Outline SDIP24, DMP24

The SRS, TruSurround technology right incorporated in the NJM2181 are owned by SRS Labs, a U.S. Corporation and licensed to New Japan Radio Co., Ltd. SRS, TruSurround is protected under U.S. and foreign patents issued and/or pending. SRS, TruSurround and the are trademarks of SRS Labs, Inc. in the United States and selected foreign countries. Neither the purchase of the NJM2181, nor the corresponding sale of audio enhancement equipment conveys the right to sell commercialized recordings made with any SRS technology.

SRS Labs requires that all users of the NJM2181 must enter into a license agreement directly with SRS Labs if the royalty is not included in the purchase price. SRS Labs also requires any users to comply with all rules and regulations as outlined in the SRS Trademark Usage Manual.
