

R2560A High-Power 12 GHz Photodiode

Description

The R2560A incorporates a high-speed planar PIN diode to provide a highly reliable, high-power photodiode module. This module is well suited for receiver applications with optical preamplification. The diode is well matched over the operating frequency band, thereby simplifying high-speed integration.

Features

- Highly reliable planar photodiode technology
- High power capability
- dc coupled
- High breakdown voltage
- Bandwidth >13 GHz typical
- Good RF match: >13 dB typical return loss
- Hermetically sealed

Applications

- Optically amplified systems (following EDFA or Raman amplifiers)
- Linear receiver applications
- FEC and Super-FEC to 12.5 Gbits/s

Absolute Maximum Ratings

Stresses in excess of the absolute maximum ratings can cause permanent damage to the device. These are absolute stress ratings only. Functional operation of the device is not implied at these or any other conditions in excess of those given in the operational sections of the data sheet. Exposure to absolute maximum ratings for extended periods can adversely affect device reliability.

Parameter	Symbol	Min	Max	Unit
