Application Example (S-1460BF) .....	6

The S-1460BF/14L60BF is a CMOS 4-bit microcomputer, which integrates ROM, RAM, a timer and I/O ports on a single chip. Since the S-1460BF/14L60BF has a  $4K \times 16$ -bit ROM, a special terminal for remote control signal output and key-on wake-up functions, it is ideal for infrared remote controller.

Due to its low operating voltage range (1.2V to 3.6V), the S-14L60BF is suitable for single-battery powered devices.
