Lifetime Guaranteed Surge Protection from the Makers of the **isobar**[®]

New Tripp Lite Protect It! Surge Suppressors offer the most reliable and cost-effective solutions for protecting all home and business applications.

Protect Your Equipment . . .

. . . with the Highest Protection Ratings

Tripp Lite Protect It! Surge Suppressors provide the highest UL-verified protection ratings of any surge suppressors in their class:

- Provide more protection—up to 2518 joules
- Designed by the leading surge suppressor manufacturer, makers of the Isobar

. . . with the Highest Insurance Coverage

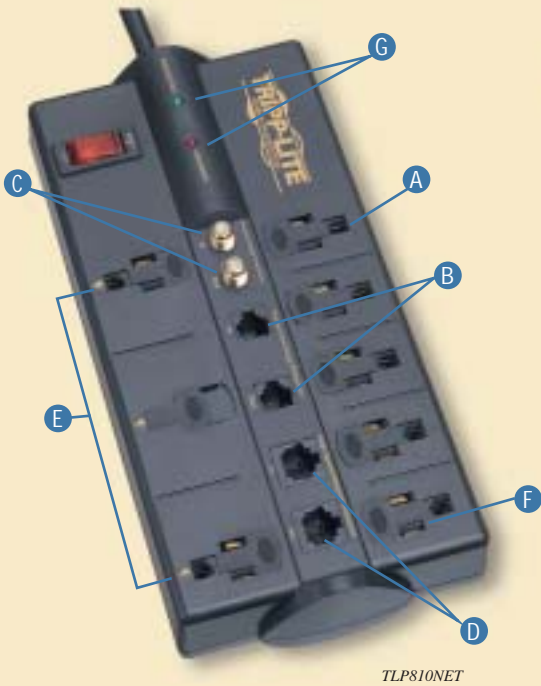

Tripp Lite backs the superior reliability of Protect It! Surge Suppressors with the highest insurance coverage of any surge suppressors in their class:

- Include more insurance—up to \$100,000
- Deliver instant coverage, without mail-back cards

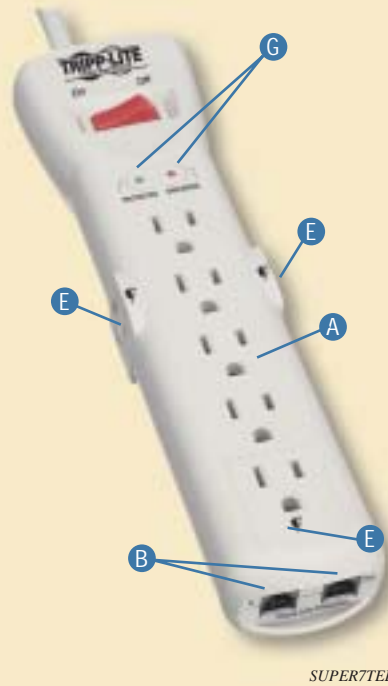

. . . at the Most Affordable Prices

Tripp Lite Protect It! Surge Suppressors' value pricing allows you to purchase more protection without compromising your budget:

- Provide more premium features at competitive value prices

TLP810NET

SUPER7TEL

PS5503M

* Additional outlet located on opposite side.
** Modem/fax protection located on bottom of unit.

A AC Protection

Protect up to eight pieces of equipment against damaging surges and disruptive EMI/RFI line noise on the AC line. Protect It! AC outlets are backed by up to 2518 joules of surge suppression which provide the highest levels of protection for sensitive electronics.

B Modem/Fax Protection

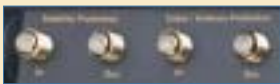

Protect computers from damage on the modem/fax line or home theater systems

from damage on the pay-per-view line with surge-protected RJ11 jacks featured on many Protect It! Surge Suppressors. Select models protect up to two telephone lines simultaneously. * Other models feature a built-in splitter (one RJ11 jack in and two RJ11 jacks out) which allow you to simultaneously connect and protect two devices sharing a single line. **

* TLP810NET. ** TLP808TEL, TLP808TELT and PS5503M.

C Cable/Satellite Protection

Protect a variety of devices (WebTVs,

televisions, VCRs, TV tuner cards and cable modems) on cable, antenna or satellite lines with surge-protected coaxial "F" connectors found on select Protect It! Surge Suppressors. TLP810SAT models feature two sets of gold-plated connectors to simultaneously protect cable/antenna and satellite lines.

D Ethernet Protection

Protect computers that rely on a network connection, whether it's a corporate Ethernet or the output from a cable or DSL modem, with surge-protected RJ45 jacks featured on TLP810NET Surge Suppressors.

E Transformer Outlets

Protect It! Surge Suppressors accommodate up to six transformers.

F Integrated Child-Safety Covers

8 outlet models feature integrated child safety covers which slide forward to guard outlets when not in use.

G Diagnostic LEDs

Identify power problems before they affect your valuable equipment with Protect It! diagnostic LEDs. A "GROUNDED" LED on select models indicates a properly-grounded wall outlet. * A "PROTECTED" LED on select models indicates that adequate surge suppression is available. If the "PROTECTED" LED ever goes out, return the surge suppressor to Tripp Lite for a free replacement.

* A properly-grounded outlet is necessary for all surge suppressors to adequately protect your equipment.

H Compact Size for Notebook Computer Protection

The Traveler™ (model: PS5503M) features all the power protection of larger surge strips in a compact, direct plug-in design that slips easily into any briefcase or notebook bag.

I Retractable Plug

The Traveler™ (model: PS5503M) features a retractable plug which eliminates scratches to your equipment or tears to the inside of your notebook bag.

Audible Alarm

If you are unable to monitor the "PROTECTED" LED, because the surge suppressor is located under a desk, an audible alarm on select models will alert you to potential problems.*

* TLP810SAT, TLP810NET, TLP808TELT.

Right-Angle Plug

A variety of power cord lengths (up to 15 ft.) allows you to place your surge suppressor wherever you need it, not wherever there is a wall outlet. In addition, right-angled plugs on most models keep power cords out of the way so equipment and furniture can be moved flush against the wall.

Wall Mounting Option

Integrated keyhole slots allow you to securely mount all models (except PS5503M) on walls or desks.
