

Large Gripper Clips

Large hook has the capacity to grab onto leads up to .014" (3.6mm) in diameter (10AWG)

Features:

- Meet your toughest testing challenges with the latest evolution of the test clip. The Gripper Clip features an innovative mini-hook tip that gives you vastly superior grabbing and holding strength. No more tests interrupted by a clip falling off its test point! The clip attaches firmly, yet gently, and will not damage components.
- Low contact point resistance of 3 milliohms and a wide operating temperature range of -4°F to 320°F. The sharp steel tip also acts as a probe! 10 Amp capacity. CAT III-1000V.
- For electronic applications choose the TL820. With a hook width of only 0.06" (1.5mm) it is ideally suited for grabbing on to the narrow spaced leads of board mounted components.
- For electrical applications that typically have larger points of contact, the TL822 has the capacity to grab onto leads up to 0.14" in diameter (10 AWG).
