

RF PIN Diode - Single in SOT-323

Description

Characterized by a very low reverse Capacitance the PIN Diode BAR63V-03W was designed for RF signal tuning. As a function of the forward bias current the forward resistance (r_f) can be adjusted to less than $1\ \Omega$ while the low reverse capacitance offers a high isolation. Typical applications for this PIN Diodes are wireless, mobile and TV-systems.

Features

- Low forward resistance
- Very small reverse capacitance
- Lead (Pb)-free component
- Component in accordance to RoHS 2002/95/EC and WEEE 2002/96/EC

Mechanical Data

Case: SOT-323 Plastic case

Weight: approx. 6.0 mg

Packaging Codes/Options:

GS18 / 10 k per 13" reel (8 mm tape), 10 k/box

GS08 / 3 k per 7" reel (8 mm tape), 15 k/box

Applications

For frequency up to 3 GHz

RF-signal tuning

Mobile, wireless and TV-Applications

Parts Table

Part	Ordering code	Marking	Remarks
BAR63V-03W	BAR63V-03W-GS18 or BAR63V-03W-GS08	CW3	Tape and Reel

Absolute Maximum Ratings

$T_{amb} = 25\ ^\circ\text{C}$, unless otherwise specified

Parameter	Test condition	Symbol	Value	Unit
Reverse voltage		V_R	50	V
Forward current		I_F	100	mA
Junction temperature		T_j	150	$^\circ\text{C}$
Storage temperature range		T_{stg}	- 55 to + 150	$^\circ\text{C}$

Electrical Characteristics

$T_{amb} = 25\ ^\circ\text{C}$, unless otherwise specified

Parameter	Test condition	Symbol	Min	Typ.	Max	Unit
Reverse voltage	$I_R = 10\ \mu\text{A}$	V_R	50			V
Reverse current	$V_R = 35\ \text{V}$	I_R			10	nA
Forward voltage	$I_F = 100\ \text{mA}$	V_F			1.2	V
Diode capacitance	$f = 1\ \text{MHz}, V_R = 0$	C_D		0.28		pF
	$f = 1\ \text{MHz}, V_R = 5\ \text{V}$	C_D		0.23	0.3	pF

Parameter	Test condition	Symbol	Min	Typ.	Max	Unit
Forward resistance	f = 100 MHz, I _F = 1 mA	r _f		2.0		Ω
	f = 100 MHz, I _F = 5 mA	r _f		1.1	2.0	Ω
	f = 100 MHz, I _F = 10 mA	r _f		0.9		Ω
Charge carrier life time	I _F = 10 mA, I _R = 6 mA, i _R = 3 mA	t _{rr}		115		ns

Typical Characteristics (Tamb = 25 °C unless otherwise specified)

Ozone Depleting Substances Policy Statement

It is the policy of Vishay Semiconductor GmbH to

1. Meet all present and future national and international statutory requirements.
2. Regularly and continuously improve the performance of our products, processes, distribution and operating systems with respect to their impact on the health and safety of our employees and the public, as well as their impact on the environment.

It is particular concern to control or eliminate releases of those substances into the atmosphere which are known as ozone depleting substances (ODSs).

The Montreal Protocol (1987) and its London Amendments (1990) intend to severely restrict the use of ODSs and forbid their use within the next ten years. Various national and international initiatives are pressing for an earlier ban on these substances.

Vishay Semiconductor GmbH has been able to use its policy of continuous improvements to eliminate the use of ODSs listed in the following documents.

1. Annex A, B and list of transitional substances of the Montreal Protocol and the London Amendments respectively
2. Class I and II ozone depleting substances in the Clean Air Act Amendments of 1990 by the Environmental Protection Agency (EPA) in the USA
3. Council Decision 88/540/EEC and 91/690/EEC Annex A, B and C (transitional substances) respectively.

Vishay Semiconductor GmbH can certify that our semiconductors are not manufactured with ozone depleting substances and do not contain such substances.

We reserve the right to make changes to improve technical design
and may do so without further notice.

Parameters can vary in different applications. All operating parameters must be validated for each customer application by the customer. Should the buyer use Vishay Semiconductors products for any unintended or unauthorized application, the buyer shall indemnify Vishay Semiconductors against all claims, costs, damages, and expenses, arising out of, directly or indirectly, any claim of personal damage, injury or death associated with such unintended or unauthorized use.

Vishay Semiconductor GmbH, P.O.B. 3535, D-74025 Heilbronn, Germany

Disclaimer

All product specifications and data are subject to change without notice.

Vishay Intertechnology, Inc., its affiliates, agents, and employees, and all persons acting on its or their behalf (collectively, "Vishay"), disclaim any and all liability for any errors, inaccuracies or incompleteness contained herein or in any other disclosure relating to any product.

Vishay disclaims any and all liability arising out of the use or application of any product described herein or of any information provided herein to the maximum extent permitted by law. The product specifications do not expand or otherwise modify Vishay's terms and conditions of purchase, including but not limited to the warranty expressed therein, which apply to these products.

No license, express or implied, by estoppel or otherwise, to any intellectual property rights is granted by this document or by any conduct of Vishay.

The products shown herein are not designed for use in medical, life-saving, or life-sustaining applications unless otherwise expressly indicated. Customers using or selling Vishay products not expressly indicated for use in such applications do so entirely at their own risk and agree to fully indemnify Vishay for any damages arising or resulting from such use or sale. Please contact authorized Vishay personnel to obtain written terms and conditions regarding products designed for such applications.
