74F182

Carry Lookahead Generator

General Description

The 74F182 is a high-speed carry lookahead generator. It is generally used with the 74F181 or 74F381 4-bit arithmetic logic units to provide high-speed lookahead over word lengths of more than four bits.

Features

- Provides lookahead carries across a group of four ALUs
- Multi-level lookahead high-speed arithmetic operation over long word lengths

Functional Description

The 74F182 carry lookahead generator accepts up to four pairs of Active LOW Carry Propagate ($\overline{P}_0\text{--}\overline{P}_3$) and Carry Generate ($\overline{G}_0\text{--}\overline{G}_3$) signals and an Active HIGH Carry input (C_n) and provides anticipated Active HIGH carries (C_{n+x} , C_{n+y} , C_{n+z}) across four groups of binary adders. The 74F182 also has Active LOW Carry Propagate ($\overline{P}$) and Carry Generate ($\overline{G}$) outputs which may be used for further levels of lookahead. The logic equations provided at the outputs are:

$$\begin{aligned}C_{n+x} &= G_0 + P_0 C_n \\C_{n+y} &= G_1 + P_1 G_0 + P_1 P_0 C_n \\C_{n+z} &= G_2 + P_2 G_1 + P_2 P_1 G_0 + P_2 P_1 P_0 C_n \\G &= \overline{G}_3 + \overline{P}_3 \overline{G}_2 + \overline{P}_3 \overline{P}_2 \overline{G}_1 + \overline{P}_3 \overline{P}_2 \overline{P}_1 \overline{G}_0 \\P &= \overline{P}_2 \overline{P}_2 \overline{P}_1 \overline{P}_0\end{aligned}$$

Also, the 74F182 can be used with binary ALUs in an active LOW or active HIGH input operand mode. The connections (Figure 1) to and from the ALU to the carry lookahead generator are identical in both cases. Carries are rippled between lookahead blocks. The critical speed path follows the circled numbers. There are several possible arrangements for the carry interconnects, but all achieve about the same speed. A 28-bit ALU is formed by dropping the last 74F181 or 74F381.

*ALUs may be either 74F181 or 74F381
