

*Accessories and separate gland parts
Reductions and adapters made of brass
with PG outside thread*

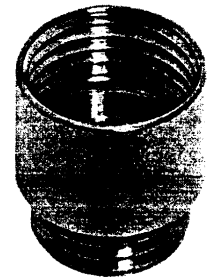

SKINDICHT® MR Reductions

Frequently threaded holes are already present on machines or equipment housings, which are too large or too small for the necessary glands. Here reducing rings or extension pieces can help solve the problem. The SKINDICHT® MR reducing rings comply with DIN 46320.

Material: nickel-plated brass.

Shape A

Shape B

SKINDICHT® MA-PG/M Brass adapter

To convert a PG outer thread to a metric inner thread. Because of the different diameters of the threads these adapters are available in two different shapes:

- Shape A: Ring adapter
- Shape B: Extension
