RegloCard-Plus Plastic Enclosures

Technical data

Applications:

Particularly suitable as a basic enclosure for regulation and control instruments in mechanical engineering, heating and sauna plant. The enclosures are also ideally suited for modern PCB technology.

Particular advantages:

- Injection-moulded in one piece in a plastic that is impact resistant and will not distort.
- Absolutely transparent lid on 1000 version
- Larger terminal compartment and access to the enclosure
- Additional grooves in terminal compartment for connectors or plates to shut off the enclosure space
- Highly stable new hinge technique
- Hinged side can easily be changed by turning the lid (on 1000 version), incl. the hinge and the latch
- Latch fastening can be sealed without needing separate parts
- New wall mount outside the seal area. The enclosure no longer needs to be opened to be mounted.
- Anodized aluminium front plate, can easily be punched and imprinted (see our Service on p. 39)
- Front plates can be inserted in the 100 version in thicknesses of 1–2–3 mm for RCP 310 and 1.5–2.5 mm for RCP 400

Material:

All plastic parts (except PC transparent lid) are impact resistant and distortion free polystyrol, temperature resistant up to about 65° C. For other material properties see pp. 26–7.

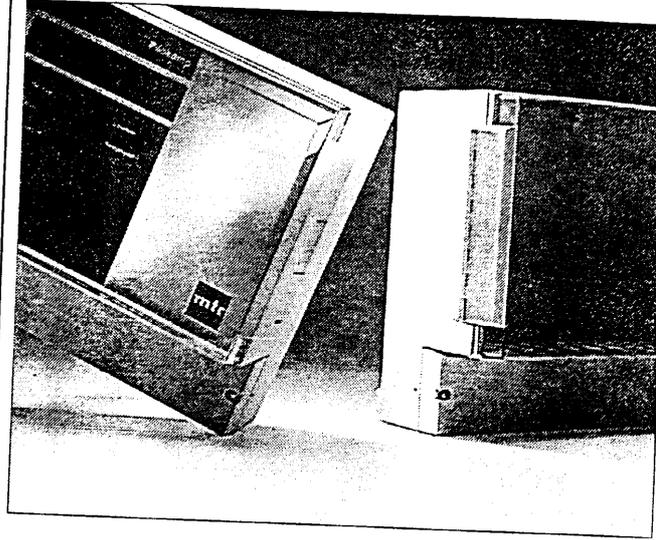

Protection classification:

IP 40
to IP 65 (with transparent lid)

Colour:

Light grey, similar to RAL 7035.
Other colours can be injected for orders of 500 and more.

RegloCard-Plus Accessories

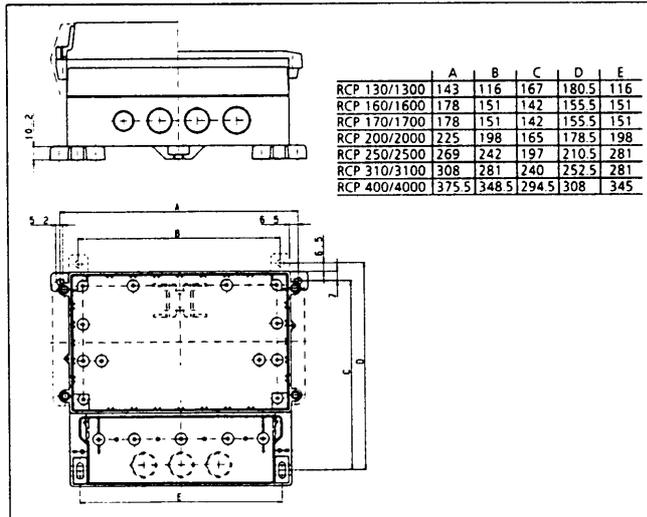

Cylinder lock/Hand latch

The cylinder lock or hand latch can be fitted later to the opening in the fastening. If a blanking plug is attached, this can easily be loosened from the rear and pressed out.

Model	Stock code
RCP-Z Cylinder lock	41000200
RCP-HK Hand latch	41002501

Wall brackets

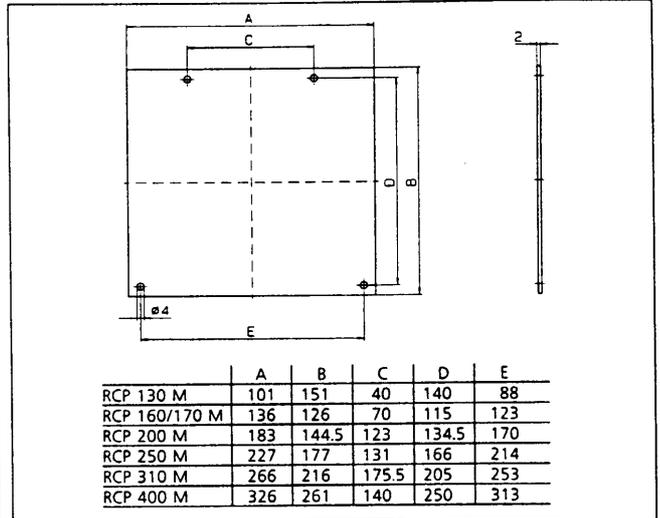

To mount the enclosure on a wall. The enclosure does not need to be opened. Will fit all RCP models:

Material: PS, similar to RAL 7035

Model	Stock code
RCP-WL Wall brackets	41000300

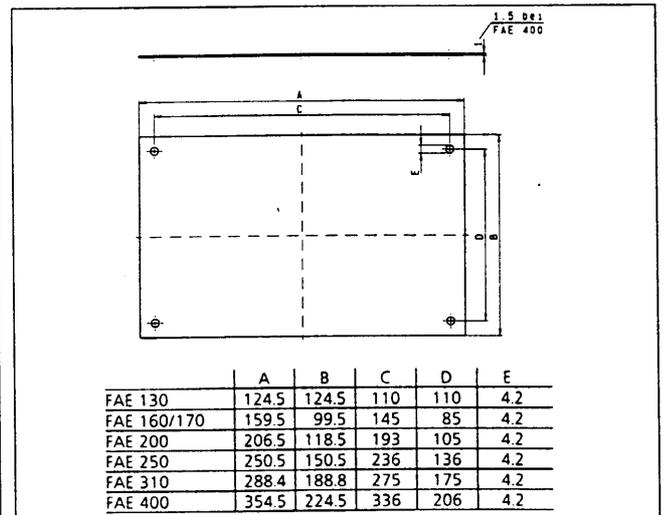

Mounting plates

These mounting plates (laminated paper) are pre-punched for attachment in the enclosure and the terminal compartment. The mounting plates in the RC series can also be inserted in the RCP model.

Model	Stock code
RCP 130 M	41000350
RCP 160/170 M	41000400
RCP 200 M	41000500
RCP 250 M	41000600
RCP 310 M	41000700
RCP 400 M	41000800

Front plates

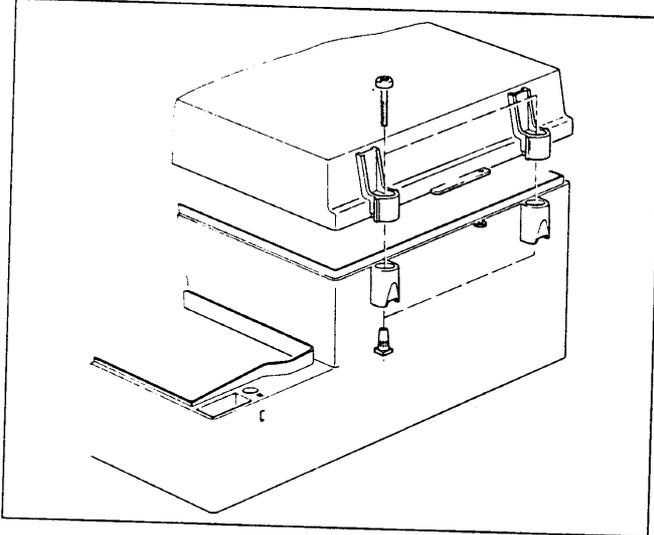

The aluminium front plates are anodized, 1 mm thick, and their dimensions match those in the RC enclosure series. Please note: front plates up to 3 mm thick can be inserted in RCP enclosures.

Model	Stock code
FAE 130	27000100
FAE 160/170	27000300
FAE 200	27000500
FAE 250	27000700
FAE 310	27000900
FAE 400	27120000

Possible Special Versions

Screw kit

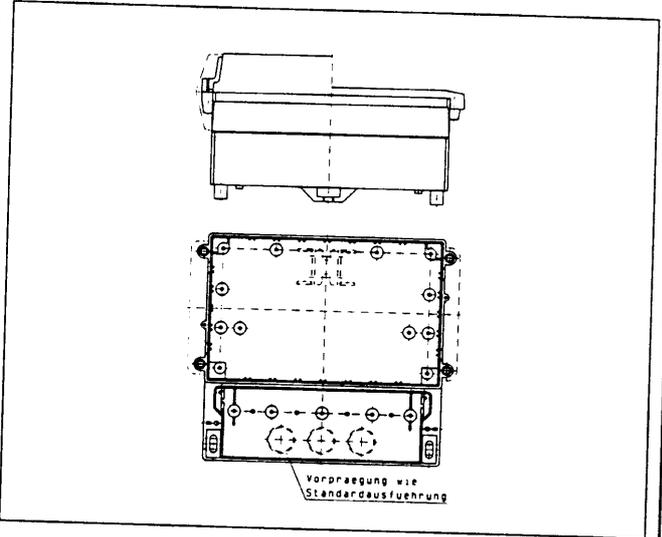

With this threaded sleeve screw kit the transparent lid can be screwed to the enclosure with or without a hinge.

Stock code	for enclosure
41060000	RCP 1300 - RCP 3100 With RCP 4000=2 sets

Order includes 4 threaded sleeves and 4 screws

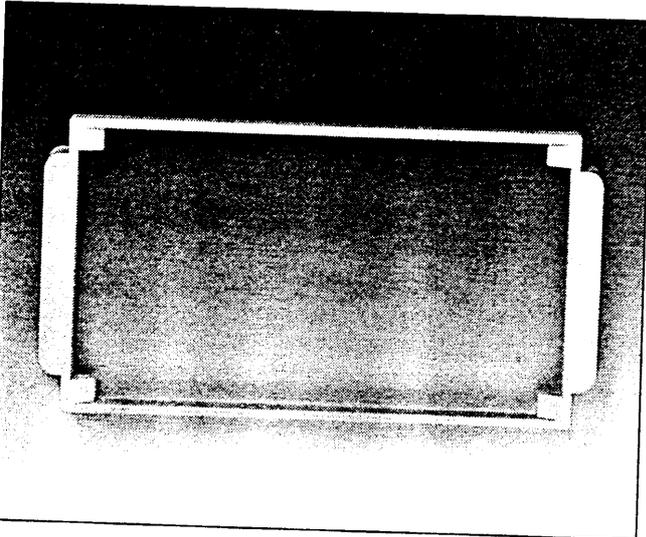

Without pre-punching

In all RCP enclosures pre-punchings for holes in the terminal compartment wall for cable in- and outlets can, if desired, be omitted, leaving a smooth wall.

Minimum order: 500

Cover frame

Cover frame for enclosure without transparent lid. The frame is clipped on to the base side and can be sealed by opening a prepunched hole.
Material: PS, similar to RAL 7035

Stock code	For enclosure
1016700	RCP 160/170
1020000	RCP 200
1025000	RCP 250
1031000	RCP 310
1040000	RCP 400

Special materials:

The following special materials can be supplied at **extra charge** on a **minimum order of 500**:

Polycarbonate, polycarbonate reinforced with fibreglass, Noryle

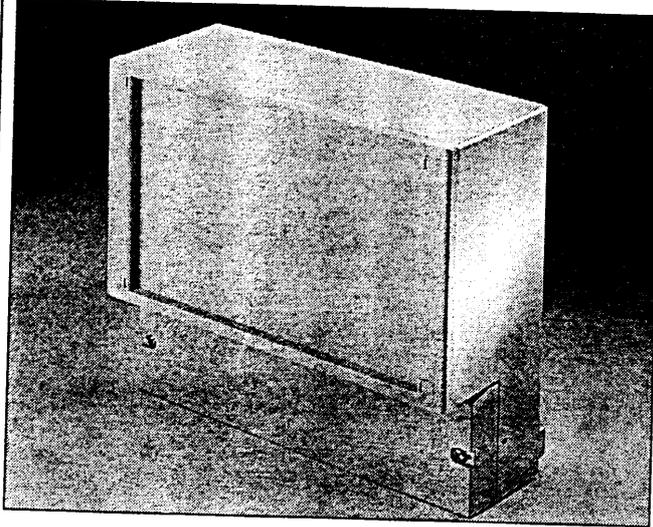

See notes on pp. 26-7, 32.

RegloCard-Plus

with membrane front IP 54

NEW
FROM BOPLA

New front

A new front to complete the RegloCard-Plus range of wall mounted enclosures.

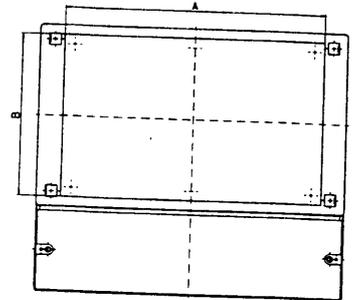

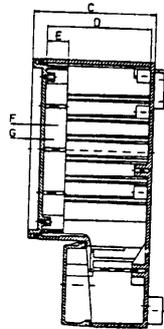

- membrane keypad surface
- fully recyclable
- no threaded inserts
- can be mounted side by side without any wasted space
- same internal measurement as standard RCP
- sealed to IP 54
- screw caps for lid fastening
